

TSI Group, Inc. Consolidates Two Manufacturing Locations

North Hampton, NH, April 28, 2009—TSI Group, Inc. (TSI) is pleased to announce the consolidation of two of its business units, ADB Industries (ADB) located in Burbank, CA and Thompson Industries (Thompson) located in Hawthorne, CA.

The planned move of the ADB capabilities to Hawthorne will be staged over the next six (6) months to allow for dual capability, where necessary, to ensure uninterrupted support for our customers.

TSI's CEO, Greg Tucker, states, "This move strengthens both organizations by providing ADB with direct access to best-in-class aluminum vacuum brazing technology, while expanding Thompson's capabilities to include aluminum dip brazing. Additionally, this consolidation will expand our collective engineering, machining and assembly skill sets for an even greater level of service and increased capability and capacity."

As part of this transition, ADB's president, Brian Dietz, will take over leadership of the combined company. Greg Tucker says, "Brian has done an outstanding job as president of ADB since its acquisition by TSI. Brian's demonstrated successful leadership qualities; thorough understanding of the brazing business and customers' needs will ensure the continued growth of both ADB and Thompson."

This consolidation better aligns ADB and Thompson to share best practices, engineering skills, manufacturing and quality processes in a consolidated location, which provides even greater value to customers.
