### **CGR Receives AS9100B Certification**

Placentia, CA, April 3, 2009 – CGR Technologies, Inc. (CGR), a TSI Group company, is pleased to announce STR-Registrar, LLC, an ANAB accredited registrar, has recommended CGR for AS9100B certification.

CGR President, Vince Corti states, "We here at CGR are proud to have received the AS9100B Certification which is a result of our intense focus on quality and processes. It is always our goal to deliver the highest quality thermal designed and engineered solutions to our customers. We will continue to improve our operations to meet the ongoing changes that our customers require."

A standardized quality management system, AS9100B is used by the aerospace industry to certify manufacturers and suppliers of parts and materials. This certification demonstrates CGR's commitment to quality and to supporting the aerospace industry.

#### About CGR Technologies Inc.:

CGR Technologies specializes in high performance military and commercial grade thermal management products. Our experienced engineers work with customers to design and develop efficient and cost effective solutions that will meet all specifications. Whether you are looking for an air-cooled heatsink, or a complex vacuum brazed, liquid cooled avionics chassis, CGR has the manufacturing capabilities to meet your thermal management needs.
